## // EDUCATION

**B.Sc. Computer Science**

Addis Ababa University

2022 – 2026 (Expected)

## 01 PROFILE

Full stack developer with hands-on experience building real-time web and Telegram-bot applications, from gameplay/dashboard systems to AI-powered planning tools. Focused on writing clean, responsive, maintainable code and staying current with modern web development practices to deliver reliable products for clients and end users.

## 02 EXPERIENCE

**Full Stack Developer** · Boss Bingo

*Feb 2024 – Jun 2024*

- Built a bingo management system with real-time gameplay controls and financial tracking.

**Telegram Bot Developer & Full Stack Developer** · Luckey Bingo

*Oct 2025 – Mar 2026*

- Built a real-time Telegram-based bingo application, including the bot logic and dashboards used by players and stakeholders.

**Front End Developer** · Moges Motors

*May 2025 – Jun 2025*

- Developed a static company website showcasing company information, services, and vehicle listings, with a clean, responsive design across devices.

## 03 PROJECTS

### Hotel Management System

- Web-based system handling bookings, room management, and core admin operations through a structured dashboard interface.

### AI Itinerary Planner

- AI-powered travel itinerary planner generating personalized trip plans based on user preferences and destination inputs.

### Real-Time Telegram Bingo App

- Real-time Telegram-based bingo system with bot integration and dashboards, supporting live game control and winner verification.

### Event Sharing Website

- Platform for creating, sharing, and browsing events, with user-friendly interfaces and event management features.
